

## VISCOGEL ELECTRO

The big expert for big jobs.

### Areas of application / Temperatures

Suitable for many types of cable with large diameters  
(e.g. underground electrical cables, etc.)  
Application temperature +5 °C to +50 °C

### Processing information

Insoluble in water, easy to use even in waterlogged conditions

### Contents

Tub 0.8 kg | Tub 4.5 kg  
other containers on request

### Storage

Ideal storage temperature +5 °C to +25 °C  
store in a dry place

Lubricating grease for easy pulling in of large diameter cables.

### Efficient

The high lubrication performance makes working easier and speeds up pulling in the cable.

### Protective

Protects both the cable sheath and the feeder equipment.
